ELECTRICIAN - 60 SECOND EXAMPLES (FEEL FREE TO COPY)

Electrician #1

Hi, I'm Chloe Barrett with BrightLine Electric. Professional service delivered with care. I'm looking for homeowners adding an electric vehicle who trip breakers or have tandem breakers in an old panel. A client tried to charge on an overloaded system. We upgraded to 200 amps, installed a smart charger, and labeled circuits. The result was safe charging every night with no more trips. This week I'm looking for electric vehicle buyers who need capacity and safety. When you hear "the panel looks full," call BrightLine. I'm Chloe Barrett with BrightLine Electric. Power your future safely.

Electrician #2

Hi, I'm Tony Silva with GlowWorks Electric. Professional service delivered with care. I'm looking for realtors with listings that appear dark in photos. We add can lights, under-cabinet lighting, and a simple dimming plan. A condo looked small before, but after lighting it felt larger and sold above asking price. This week I'm looking for agents with dim listings that need a quick lighting upgrade. When you hear "the photos feel flat," think GlowWorks. I'm Tony Silva with GlowWorks Electric. Bright ideas deliver better results. We provide fast quotes, tidy crews, and rooms that pop online.
